
NIAGARA FRONTIER TRANSPORTATION AUTHORITY

Committee Meeting

June 24, 2021

Transcript of Video Recording
of Proceedings held at NIAGARA FRONTIER TRANSPORTATION
AUTHORITY, 181 Ellicott Street, Buffalo, New York,
stenographically transcribed by VALERIE A. ROSATI, Notary
Public.

1 MEMBERS IN THE BOARDROOM:

2 Sister Denise Roche (Chair)
3 Commissioner Adam Perry
4 Commissioner Anthony Baynes
5 Kimberley Minkel (Executive Director)
6 David State (General Counsel)
7 John Cox (Chief Financial Officer)
8 William Vanecek (Director, Aviation)
9 Tom George (Director, Public Transit)
10 Helen Tederous (Director, Public Affairs)
11 Dejuan Hardy (Manager, EEO/Diversity)
12 Susan Ohol (Admin. Assistant to Director of
13 Public Transit)
14 Robert Jones (Manager, Service Planning)
15 James Morrell (Deputy Director, Public Transit)
16 Sara Dayton (Lumsden McCormick)
17 Seth Hennard (Lumsden McCormick)

18 MEMBERS ON THE PHONE:

19 Commissioner Joan Aul
20 Commissioner Rev. Mark Blue
21 Commissioner Margo Downey
22 Commissioner Stephen Tucker
23 Steven Duquette (Chief Information Officer)
24 John Schaefer (Director, Engineering)
25 Mark Pereira (Procurement Manager)
26 Rick Hanulewicz (Facilities and Property Manager)
27 Christine D'Aloise (Director, Risk Management
28 and Special Projects)

29 MS. MINKEL: Sister, I think we're ready. Do you
30 want Dave to call the roll first?

31 CHAIR SISTER ROCHE: Yes. Welcome to this meeting of
32 June 24th, 2021 for our joint committee meetings.
33 And, David, would you please call the roll?

1 MR. STATE: Thank you, Sister.

2 Good morning, commissioners. This is a roll
3 call to see who we have.

4 Commissioner Ansari?

5 Commissioner Aul?

6 COMMISSIONER AUL: I'm here, David.

7 MR. STATE: Thank you. Commissioner Baynes?

8 Commissioner Blue?

9 Commissioner Downey?

10 COMMISSIONER DOWNEY: Yes.

11 MR. STATE: Commissioner Hicks?

12 Commissioner Hughes?

13 Commissioner Perry?

14 Commissioner Persico?

15 Commissioner Tucker?

16 COMMISSIONER TUCKER: Here.

17 MR. STATE: Thank you. Sister Denise?

18 CHAIR SISTER ROCHE: Here.

19 MR. STATE: And Commissioner Wilcox?

20 So we're short our quorum, but we can begin
21 the meeting. We won't be taking any action
22 obviously. We will not be going into executive
23 session. But the meeting can start and then

1 commissioners will begin to come --

2 MS. MINKEL: And Commissioner Perry is here.

3 MR. STATE: Yes, I will note Commissioner Perry as
4 being present. Thank you.

5 COMMISSIONER PERRY: Does that mean I'm here or does
6 that mean I'm like a gift?

7 CHAIR SISTER ROCHE: Both.

8 Well, this morning we're going to begin with
9 our annual audit report. And I am thrilled to
10 bring back and introduce for some of you who have
11 not met them, Sara and Seth from Lumsden
12 McCormick. Welcome.

13 SARA DAYTON: Thank you.

14 CHAIR SISTER ROCHE: And please tell us about the
15 audit results.

16 SETH HENNARD: Thank you. So let's jump right into
17 it. It will probably just take five or ten
18 minutes or so. And if you don't have a paper
19 copy of the presentation, we have extras if
20 anybody needs them. We can pass those out if
21 anybody needs copies of those.

22 But as we said, the main purpose of the
23 presentation here is a review of the 2021

1 financial statements. And so on page one of the
2 slides, that's a list of all the different
3 reports that are in the package there. If you're
4 on the phone, the presentation in the binder is
5 on the first, the first section there.

6 So on slide one is the reports. Management
7 does prepare the financial statements and the
8 related footnotes and we review and audit those
9 work papers. The three things that are in the
10 management reports is management's certification
11 of the financial statements. That's management
12 saying the statements are accurate. Management's
13 report on internal controls is basically just
14 management taking responsibility for the
15 financial internal controls of the organization.
16 And management's discussion and analysis is also
17 prepared by management, and that's an analysis of
18 the major transactions and fluctuations during
19 the year.

20 Everything else on the bottom of page one is
21 all the different auditors' reports. So each
22 bullet point is basically a separate report or
23 separate thing we have to do. So just kind of

1 quickly going through them. The main thing we do
2 is a report, an opinion on your financial
3 statements as to whether or not that's a fairly
4 accurate representation of your finances. So
5 it's an unmodified clean opinion. It means we
6 had no issues and it's a fairly presented report.
7 That is the best quality assurance you're looking
8 for.

9 The federal single audit is the audit of the
10 federal grants and the related data collection
11 forms and online submissions. So we had no
12 findings with your federal single audit report,
13 so there's no findings with the federal grants.

14 The New York State single audit is required
15 by the New York State Department of
16 Transportation to audit certain grants received
17 from them. Again, no findings with that report.

18 The compliance with investment guidelines of
19 public authorities is required by a pre Triple A
20 that we look at your investment portfolio and
21 your policies and procedures, and there's no
22 findings with that report.

23 The national transit database is done in

1 October when that report becomes available. We
2 also do agreed upon procedures of your passenger
3 facility program at the airport. And these other
4 reports you have that we'll go through in a
5 second.

6 Slide number two is just the audit plan.
7 This is kind of a very brief reminder that it's a
8 risk based audit. So we have communication with
9 management throughout the year. We discuss the
10 more risky transactions. We talk about the
11 pension, the OPEB items. Those are huge
12 liabilities and significant estimates. We
13 determine your procedures and the updates,
14 determine the risky areas, audit those areas. We
15 also coordinate with the internal audit
16 department, making sure that we are in agreement
17 with what they are finding, review their reports
18 and we rely on those as appropriate.

19 This is a reminder. The financial audit
20 does not -- is not designed to detect fraud so
21 it's not really the purpose of the audit, but if
22 we were to find it, we would report it to you and
23 let you know if we found anything, which we did

1 not.

2 Page three. The required communications.
3 That's a three-page letter that's in your package
4 there, but the summary of it is on slide three.
5 Basically, there was no disagreements with
6 management. There was no substantial issues to
7 report. The audit went very smoothly. We had no
8 concerns. It went very well actually.

9 The middle part of that is the accounting
10 estimates. That's a reminder that the financial
11 statements do contain a lot of estimates that we
12 have to rely on management's assertions and
13 actuary assumptions. The bullet points listed
14 there are some of the more significant ones, the
15 bottom two especially. The pension liabilities
16 is a very substantial number that is really
17 through New York State. You have no real control
18 over that number. Then, finally, the other post
19 employment benefits is really a half a billion
20 dollar liability that you guys really have
21 actuarial assumptions over that. And Sara will
22 go through the numbers and explain a little bit
23 further, but those are very substantial amounts.

1 They're just more estimate based.

2 The bottom of page three is the additional
3 disclosures of COVID-19. So those notes are
4 still there from last year. Note number two
5 discloses all the different federal grants
6 received from FAA and FTA, the CARES Act, the
7 CARES Act Part 2, American Rescue Plan. Those
8 are basically the grant awards you received and
9 you're spending out this year, last year and into
10 the future.

11 Note number thirteen is risks and
12 uncertainties. That basically talks about just
13 that we're not sure what's going to happen with
14 COVID. Even though it's mostly hopefully getting
15 over, the whole point is when are you going to
16 get back to normal, when are your fares coming
17 back, when are your enplanements coming back. So
18 that uncertainty, that's disclosed in the
19 footnotes.

20 Page number four is recommendations. So the
21 recommendations. We have no material weaknesses.
22 We do discuss minor efficiency items and such
23 with management, just doing a review of those

1 items. And then new pronouncements. We talked
2 about this for the last few years. GASB 87 with
3 the leases is still coming out. That got
4 postponed due to COVID, so you have 2023 still,
5 so that's still a couple years out. And GASB 96
6 is the subscription based IT. Basically think of
7 that as leases for software for multiple-year
8 contracts. So it's kind of the same thing, just
9 whether it's a physical asset or really a
10 software asset.

11 SARA DAYTON: I'm going to go through the numbers
12 pretty broadly. I think probably more so than
13 most years you've really been focused on the
14 numbers and what's happening. So I'm going to
15 start with the income statement. As you can see
16 on the operating revenues, fares are down,
17 significant increases in ridership. As you
18 recall, from April to June of 2020, which was
19 part of this fiscal year, your fares were
20 suspended, Buffalo Public Schools was remote most
21 of the year, so significant declines in ridership
22 that, you know, are not expected to come back to
23 their pre-COVID levels quickly.

1 Concessions, commissions and rentals also
2 down significantly as a result of the decline in
3 enplanements as well. So your total operating
4 revenues are down about forty-four percent from
5 the prior fiscal year. Keeping in mind in the
6 prior fiscal year you had the start of COVID.
7 You had about a month and a half of activity in a
8 COVID world.

9 On the operating expense side, your
10 salaries, payroll taxes and benefits are down
11 really as a result of a reduction in hours in
12 overtime. Depreciation, however, remains
13 consistent, meaning you're kind of replacing your
14 assets as they're deteriorating and keeping that
15 going. Other operating expenses, also all of
16 those declines are really COVID related.
17 Decreases in fuel costs because of fuel purchases
18 that you had to make. Decreases in insurance.
19 That's really due to a decrease in claims costs
20 and improvements in safety really. So at the end
21 of the day, your operating loss was about two
22 hundred and -- just below two hundred and seven
23 million as opposed to a hundred and seventy-eight

1 million in the prior year.

2 The way you were able to continue operating
3 was really through these federal grant programs.
4 So as you know, the CARES Act was the first of
5 those. In total you received just under
6 eighty-five million dollars in CARES Act funding,
7 between the Federal Transit Administration and
8 the FAA. Some of that was recognized in 2020. A
9 majority of that was recognized in 2021.

10 In December of 2020, they passed -- I'm
11 going to call it CRRSA for purposes of time.
12 That was the next funding. And that was about
13 forty-three million dollars, and really all of
14 that is recognized as revenue and a receivable in
15 2021. And then more recently is the American
16 Rescue Plan Act or ARPA, which was from March of
17 this past year, and that funding is going to be
18 combined between the FAA and FTA, expected to be
19 just under a hundred and two million dollars. So
20 you can expect to see that revenue in fiscal 2022
21 and beyond.

22 You can see the decrease continuing in
23 non-operating revenue in your passenger facility

1 charges, or PFCs, as a result of the decline in
2 enplanements. Your capital contributions are up.
3 There's some CARES funding in there as well. So
4 that your actual change in net position is an
5 increase of about forty-five million dollars from
6 year to year. Again, thanks to really that
7 funding.

8 Page six is the balance sheet, so this at a
9 point in time. So this is March 31st, 2021
10 compared to March 31st, 2020. You can see your
11 cash and investments are up, again because of
12 that funding. The receivables are up because of
13 the CRRSA funding which hadn't been received as
14 of year-end. No significant changes in capital
15 assets. You did have about fifty-nine million
16 dollars worth of capital additions during the
17 year, offset fifty-one million worth of current
18 year depreciations.

19 That deferred outflows of resources line
20 goes with the net pension liabilities, the total
21 OPEB liabilities and the deferred inflows of
22 resources lines. Those are all a result of
23 actuarial calculations. As Seth mentioned on the

1 pensions, so that is your participation in the
2 New York State Employees Retirement System and
3 Police and Fire Retirement System. You can see
4 that the liability there went up relatively
5 significantly from twenty-seven million to almost
6 fifty-three million at 3/31/21. That's really a
7 function of when the investments in those plans
8 are measured. The measurement date is March
9 31st, 2020 for that plan. So if you recall, on
10 March 31st of last year, the markets were not
11 doing well at all. This was right at the
12 beginning of COVID. So as a result, the funding
13 of those plans looks very low because it has to
14 be measured on that date. So that has since
15 recovered, so you can expect that liability to go
16 back down when you report it for your 3/31/22
17 year end which will be measured as of 3/31/21.

18 On the OPEB liability -- so this is your own
19 liability as opposed to one with the state. OPEB
20 is your other post employment benefits. And this
21 is really the promise to pay health insurance to
22 any employee who retires with ten or more years
23 of service. Again, an actuarial calculation.

1 The actuary calculates those amounts each year.
2 It is also based on a measurement date a year
3 prior. And really the decrease in this liability
4 is a result of the difference between expected
5 versus actual results. And it's really a
6 function of your good claims experience. So your
7 safety rating has been going up, your claims are
8 going down, so it's really reduced that liability
9 because their expectation was that your claims
10 would be much higher.

11 My understanding too is the claims were even
12 more positive -- or, went down even more during
13 this current year, so when that's measured again
14 for your 3/31/22 statements, I would anticipate
15 that liability going down even more. Obviously,
16 though, it is a very large liability and has a
17 big impact when you look at the organization as a
18 whole on your -- when you look at liabilities,
19 it's more than half of your total liabilities, so
20 any changes in those estimates will continue to
21 have a significant impact on your financial
22 statements.

23 I think those are all the big pieces I

1 wanted to go through, trying to keep it
2 relatively quick for you. Are there any
3 questions that you have on the numbers or on
4 anything that Seth went through?

5 COMMISSIONER AUL: Hi. It's Joan Aul. Hi, Sara and
6 Seth. Just a quick question. So on page four on
7 the, on the other comments, I know it's not a
8 significant deficiency, but can you expand a
9 little bit where it says continue to review the
10 GBNRTC and NITTEC relationships and allocations?
11 Can you just expand on what the intent is there?

12 SETH HENNARD: Yeah. So those are really different
13 organizations that it's not really clear at the
14 state level how they wanted those to be reported.
15 We've seen different transit authorities report
16 them differently. Some report them as part of
17 their statements, some report them as a separate
18 entity, separate audits. So we just wanted to
19 make sure everybody is aware that neither one of
20 these entities are audited. NFTA does process
21 the transactions. And the tricky part with these
22 is they also receive federal funds. So our
23 approach to this has been to make sure it's in

1 your single audit so it is audited so the federal
2 government has some assurance that someone is
3 looking at these funds, but they are not reported
4 in your financial statements. So just to keep
5 aware of how that relationship works and the need
6 to evaluate it, and if we had any guidance from
7 New York State on how they would like that to be
8 done, that would be helpful. But there's
9 different agencies -- everybody reports it
10 differently, so we just want to make sure that
11 it's audited in a way that it's at least covering
12 the federal funds. That's how we've been doing
13 that.

14 SARA DAYTON: And we've disclosed that in the notes,
15 the statements as well, Joan.

16 COMMISSIONER AUL: Okay. Thank you.

17 MS. MINKEL: Are there any other questions?

18 Well, thank you.

19 SARA DAYTON: Thank you.

20 CHAIR SISTER ROCHE: Great job. Great summary.

21 MS. MINKEL: So up next, Sister, is Tom George to
22 provide an update on surface transportation.

23 Tom?

1 MR. GEORGE: Good morning. First, before I get into
2 the discussion items, I'll just briefly go over
3 our performance for the month of May, 2021. We
4 had a very favorable month. Our operating
5 revenues were essentially on budget. We had very
6 favorable operating assistance, both Erie County
7 sales tax and mortgage tax combined were nearly
8 twenty percent favorable for the month. Our
9 state operating assistance was seven percent
10 favorable for the month. And, overall, total
11 operating assistance was nine hundred thousand or
12 eight percent favorable for the month. That was
13 coupled with our operating expenses being
14 favorable as well. Personnel, service and
15 maintenance, and repairs, transit fuel power,
16 amongst others, were favorable for the month.
17 Overall we ended up the month of May at a
18 position on the operating side two point four
19 four six million favorable. That combined with
20 April year to date, we were four point five two
21 million favorable for the year to date on the
22 financials.

23 On the Metro initiative status report, I'm

1 going to skip over that today because the two
2 primary items of discussion on that are also our
3 discussion items. I'm also going to skip over
4 the performance in the book. I will note that,
5 however, our ridership, our on-time performance
6 and our miles between service interruptions are
7 all starting to show some rebound from the
8 positions that we've been in previously on those
9 items.

10 Skipping over to my committee reports, if I
11 could. The citizens advisory committee was held
12 on May 27th. The minutes are included in your
13 book. We did discuss the Erie Canal Harbor
14 Station redesign and had a number of comments
15 about accommodations that should be included in
16 that design. We talked with the committee about
17 both our onboard survey and our customer
18 satisfaction survey. We went through with them
19 the transit service improvements and some of the
20 initiatives that were ongoing right now. Talked
21 a little bit about that. We had some comments
22 relative to -- about branding the initiative so
23 that people can get excited about it, and also

1 making sure that organizations with people
2 directly affected by the proposed changes are
3 engaged.

4 We talked again about bus stop balancing and
5 we talked a little bit about the proposed
6 signage. There was comments included on that.
7 We also provided an update on the MetGo system.
8 We did have some general comments from the
9 committee. We talked about again rebranding --
10 or, branding the service improvements to make it
11 exciting. We talked about how we're going to be
12 enforcing fare gates when they go into place in
13 the system. We also talked about mask protocols
14 still being included and the requirement to
15 maintain masks in the system, and we also talked
16 a little bit about driver training in relation to
17 customer service. Our next citizens advisory
18 committee is scheduled for June 22nd, so next
19 month.

20 And then we also had an accessibility
21 advisory committee meeting on May 27th. We
22 indicated that we were seeking individuals to do
23 audits on behalf of the ADA, and we were asking

1 those folks who were interested to apply. We
2 talked about the new fare capping system and the
3 new system again, went through the details of
4 that. And we also indicated that we are now
5 participating for the first time in the ABBG or
6 American Bus Benchmarking Group. It has always
7 done customer satisfaction surveys as long as
8 we've been a part of them. This year we are
9 introducing a customer satisfaction survey for
10 the paratransit community, which is new for the
11 group and we are one of the agencies that are
12 participating in that. So that was ongoing and
13 we wanted to give them a heads-up on that. And
14 last, but not least, we also indicated that the
15 seating capacity on the PAL vehicles is going to
16 be increased to half the vehicle's capacity at
17 that point in time due to some demands.

18 Since that point, as an aside, on June 21st,
19 this previous Monday, we have relaxed the
20 capacity limits on our system system-wide. So we
21 are no longer employing capacity restrictions on
22 the system. It really isn't an issue. We don't
23 really have capacity problems, we haven't had

1 pass-ups, but we now have formally relaxed that
2 requirement in the system.

3 That was all I had on my report. If there's
4 any questions.

5 CHAIR SISTER ROCHE: Any questions of Tom?

6 Everything is perfect.

7 MR. GEORGE: Hearing none, I did want to indicate
8 that, again, it's time for our Metro annual
9 performance report. A very different and
10 challenging year as you may imagine. The metrics
11 really -- you know, we really look at them
12 heavily on an annual basis to see how we're
13 trending, and the trends have been blown up, as
14 you may imagine. Across the board they've been
15 totally, totally blown up, so -- but we did put
16 the report together. It kind of gives you an
17 indication of where we are system-wide and what
18 we've been doing and kind of gives us a new
19 benchmark to move forward from. This will be
20 released on our website effective today, and it
21 will be sent out to our electeds and stakeholders
22 as per our normal practice.

23 So that was what I wanted to cover in my

1 report. The next thing is our discussion items.
2 We're going to tag team this a little bit today.
3 As a standing, standing invitee, Rob Jones, our
4 manager of planning, is going to start us out and
5 talk about the service improvements and the
6 program we have there, and then we're going to
7 transition to James Morrell who is going to talk
8 about the fare structure and then I'll wrap it
9 back up. So with that, I'll introduce Rob and
10 get you started with that.

11 MR. JONES: Yes. Thank you, Tom.

12 Good segue from the annual performance
13 report into this presentation, mentioning that a
14 lot of the metrics and trends are kind of blown
15 up. So we'll kind of start there and say, you
16 know, where were we when step back before COVID
17 versus where are we right now. So, honestly, our
18 ridership on the bus, just looking at bus only
19 pre-COVID, was around sixty-six thousand,
20 sixty-seven thousand per day and now we're down
21 to really around thirty-two thousand, so about
22 fifty percent of our ridership that we were about
23 two years ago so -- or, eighteen months ago.

1 It's a really dramatic shift. And you can
2 see in the top chart that some of that is school
3 related, but a lot of it is general public
4 related as well. Our peakiness in our system is
5 pretty much gone. There's no more really
6 pronounced morning and afternoon peaks. It's a
7 different type of travel out there. It's really
8 important for us to understand where our riders
9 need to travel. So that's changed a lot as well.
10 I already mentioned Buffalo Schools were online.
11 I think the auditors mentioned it as well. That
12 changed a lot for us. That's a whole segment of
13 ridership that was gone. A lot of colleges
14 adding a lot of remote classes really changed
15 where we were at that point.

16 So why do we need to change service? Why
17 should we look at changing service? Well, we
18 just noted that the ridership patterns are
19 different. A lot of work and education from home
20 has happened in the last eighteen months and a
21 lot of it is expected to continue, maybe more so
22 on the work side than the education side. People
23 are online shopping more. We saw it during the

1 pandemic; grocery delivery, Amazon. Those are
2 the areas that were growing. So people are
3 taking less trips for retail now than they were
4 before. And, additionally, telehealth medical
5 appointments. You know, less in face with the
6 doctor. I've done basically all three of these
7 things during the pandemic at some point and I
8 know a lot of other people have as well. And
9 also responding to our funding and staffing
10 challenges moving forward.

11 So really critical to us, our understanding
12 from the public what their needs are in terms of
13 our system. So about a year ago, June, 2020, we
14 were right in the middle of the pandemic, at the
15 beginning. We were really confused as to what
16 was going on and what our riders were doing. And
17 we put out a survey to our public and asked them
18 a lot of different questions. Are you riding,
19 are you not riding? If you are riding, why are
20 you riding? So half our respondents at that
21 point identified as essential workers. They were
22 riding because they had to get to their jobs and
23 transit was the way to do that.

1 Most recently they're going to work and
2 they're going to the grocery store, things that
3 we all have to do and people still have to
4 continue to do. But really interestingly, the
5 most frequent reason for people not riding was
6 because they were working from home, which leads
7 to why we saw some of that lower demand for the
8 peaks and why our rail service was down slightly
9 more than the bus service overall during the
10 pandemic.

11 Another point to note there is that about
12 forty-three percent of respondents said they plan
13 on riding transit less frequently moving forward.
14 Obviously this is self-reported. We were at the
15 beginning of the pandemic. Things have changed
16 now. But it's important for us to know that not
17 all our ridership is coming back very quickly, so
18 we need to respond to that as well.

19 So additional public outreach efforts last
20 month and this month to do really extensive
21 public outreach. We got five hundred and
22 seventy-two respondents to our survey. And I
23 want to thank the commissioners and our other

1 partner organizations for helping us spread that
2 word. We have really great partnerships with the
3 City of Buffalo, Town of Amherst, and a lot of
4 our community partners, religious organizations,
5 nonprofits. We got a lot of widespread coverage
6 of that. United Way sent it out, as an example,
7 in their e-mail blast that they usually get
8 thousands and thousands of people there. So we
9 really tried to cast a wide net.

10 Additionally, we went out and talked to
11 people in the system. So here you're going to
12 see some of my staff and some of (inaudible) from
13 service planning's staff out talking to our
14 customers. It's been almost sixteen, seventeen
15 months before we were actually talking to our
16 customers because of the pandemic. They were
17 really glad that we were out there. We were at
18 University Station, out in front of our building
19 at MTC, out at Portage Road in Niagara Falls,
20 just interacting with people. And not everyone
21 filled out a survey, but we talked to a lot of
22 other people who shared their concerns with us
23 and we took notes on that as well. So some of

1 the most common requests were suburban access,
2 not only for jobs but also for retail. Some
3 recreational destinations were a little bit
4 surprising to us. We don't usually hear that
5 comment. And then all-day and weekend service to
6 areas that we only service with express networks
7 right now.

8 Really interesting also is we asked our
9 respondents to say, well, what's the most
10 important factors of service to you? And the
11 three highest by far are shorten wait times,
12 realtime information and bus shelters and benches
13 (inaudible) followed really closely by travel
14 time. And that's really consistent with -- Tom
15 mentioned the ABBG survey. We asked a similar
16 question on that survey over the last seven,
17 eight years and those are usually kind of the
18 top, top things. We wanted to reaffirm that with
19 our community.

20 So moving forward with planning service
21 during COVID and coming out of COVID is really
22 difficult because it's a lot of change to our
23 system, a lot of change for our ridership. So we

1 need to come in with some assumptions. I already
2 mentioned the peaks. If you look at the bottom
3 chart there, the orange is what the system used
4 to look like in terms of temporal ridership. You
5 see really pronounced peaks during the a.m. and
6 p.m. commute, including when school kids got out,
7 kind of around the three o'clock time frame. The
8 blue line is what we're seeing now. It's pretty
9 much -- pretty flat. You see a little bit more
10 ridership in the p.m., but it really kind of
11 builds up in the p.m. and then kind of tapers
12 off.

13 So we look at that and say, well, how do we
14 respond to that? Maybe we need less peak service
15 and we should spread our resources out throughout
16 the day and throughout the community because
17 people's travel needs are changing. We think we
18 need more reliable express services on routes
19 where we have sustainable demand. A lot of those
20 routes right now may have one trip in, one trip
21 out; two trips in, two trips out. We know that
22 people's schedules need to be more flexible than
23 that. If you don't work within that shift time,

1 it doesn't really work for your schedule, you're
2 not going to take it as an option.

3 And, lastly, pulse system may be useful on
4 parts of the network. To put that simpler, it's
5 really kind of a time transfer system. So think
6 about being at a location and having all of the
7 routes come in, and instead of a bus leaving or
8 you miss that timing, they'll wait for a set
9 time. So like ten o'clock all of the buses are
10 going to go back out and then at ten-thirty the
11 same thing will happen. So you're really
12 reducing that wait time for individuals, so
13 you're making that transfer between routes really
14 easy and simple for people to do.

15 So this is a really quick rundown of some of
16 the draft service improvements. And I say draft
17 service improvements because this is really the
18 first bite at the apple for the public. We're
19 putting out a lot of options to people, including
20 our stakeholders and the public, that we're going
21 to get comments and refine as we move forward.
22 So some routes may have only one or two options;
23 some may have four or five. Really we're at that

1 kind of throw spaghetti on the wall and see what
2 sticks type of phase. (Inaudible) comments on
3 the whole system, different concepts and really
4 get a sense of what people value.

5 So we kind of broke it down into the three
6 categories that we discussed before. The first
7 is our express network. We want to have more
8 permanency on the routes that are working and
9 have kind of more options for people who work
10 different shifts to match their demands. And we
11 may eliminate routes that have some very low
12 ridership where we don't think we're ever going
13 to be able to capture some of that demand.
14 Create faster service between Buffalo and Niagara
15 Falls, add some limited-stop services as well.

16 Finally, Niagara Falls. We haven't tackled
17 Niagara Falls network in a couple of decades.
18 We've been working really closely with the
19 Niagara Falls mayor and some partners there from
20 the CAC and trying to really simplify the service
21 up there in terms of legibility, ease of use,
22 making it easier to understand for people to have
23 that easier transfer at our two transit centers

1 since we have those resources up there in that
2 community. And providing new routes that serve
3 the airport, Vantage International Pointe
4 Industrial Park, N Triple C and BOCES. Those all
5 kind of came up out of that. And providing that
6 77 faster travel between -- on both communities
7 will enhance not only the ridership for our
8 regular customers, but also for tourism as well.

9 And then in terms of the Erie County
10 network, we've heard a lot of people refer to new
11 access to job areas. Adjusting frequencies in
12 certain areas to meet that new demand.
13 Streamlining some of the routing, especially
14 through downtown where it can be very confusing
15 where we have kind of routes on every street,
16 people are not always sure where to go. And
17 potentially creating some access to more
18 recreational areas.

19 So I could walk through every single route
20 and all of the options and we'd be here all day,
21 so we're not going to do that. Instead, what
22 we're going to talk about is our approaches to
23 how we're creating the service. So some

1 examples, essentially, of how we're creating
2 service through this plan.

3 The first one I just talked about. So we
4 looked at some areas and said, well, we may need
5 some new routes in the system to meet some of
6 that demand. The gray underlined area is the
7 area we would no longer serve on Niagara Falls
8 Boulevard and Ward Road. But, really
9 importantly, the new Route 58 creates better
10 service to Niagara Falls International Airport.
11 It provides service to Vantage International
12 Pointe which is an industrial park where the
13 Niagara County IDA is. It has over a thousand
14 jobs at that location that's not currently being
15 served importantly. And it provides better
16 service to N Triple C and BOCES to match what
17 their schedules are and their demand.

18 The next approach is limited stop service.
19 So I was here in January or February talking
20 about the Bailey Ave. plan. This is just kind of
21 another look at it. It's not the only example,
22 but this is a way to not only shorten the wait,
23 but to respond to a community request for faster

1 and frequent service on major corridors for the
2 ridership (inaudible).

3 Another one is truncation. So there's lots
4 of areas in our system where maybe we were going
5 extra distance that we no longer go. This is an
6 example of 69. The gray dashed line, which is
7 almost as long as the line that currently leads
8 to Lancaster, was a service that we had to Alden.
9 We plan on not going to Alden and ending in
10 Lancaster. And what that does for us, though, is
11 allows us to take those resources and better
12 match it to the service that is existing, add
13 another trip, another round trip for those
14 commuters which represent about ninety percent of
15 the riders on that route anyhow. So it's really
16 about looking at the overall service and we're
17 tweaking efficiencies to better serve the riders
18 we already have.

19 Consolidation. This is an example of the 70
20 East Aurora route. Right now we have one trip in
21 on one variant in the morning and one trip on
22 another variant that goes a different route. The
23 same thing in the afternoon. So really unless

1 you work the exact schedule that fits those
2 needs, you can't really use the service.
3 Instead, what we're going to do is provide all of
4 the trips on the same route and add a little bit
5 of service there so we have three trips in, three
6 trips out, to add that flexibility for people.
7 So regardless if you're working five -- or, eight
8 to four-thirty or nine to five, you'll have a
9 trip that serves you as opposed to trying to fit
10 a square peg in a round hole for only one kind of
11 shift time.

12 Extension. So we heard a lot from our
13 communities there were areas we weren't going or
14 weren't serving that we should serve now. So
15 this is an example of one of the options on the
16 47 (inaudible) Road where we modified the route
17 now to instead of ending at the airport which was
18 a convenient end location (inaudible) lot of
19 ridership on that route at the airport, going out
20 on Transit Road where we don't currently have
21 service in this location along Transit Road, to
22 serve those areas over there near Northtown
23 Plaza, to provide some job access and ending at a

1 common time and point at Eastern Hills Mall where
2 people are also trying to get to. So it's really
3 a smaller change, but we're extending it up
4 Transit Road where we know that there's some
5 demand, but it's very dispersed demand in terms
6 of the density.

7 So I talked a little bit about downtown. So
8 just this map is a little bit confusing for
9 people to look at, and that's only five routes,
10 and we have forty routes that come downtown. So
11 this is just one example of how it can be
12 confusing as a passenger to kind of go out there
13 and say, okay, well, I'm going to the north or
14 northwest. Where do I go? If I'm on this
15 street, I can get the 11; if I'm on this street,
16 I can get the 20. What we're going to do is
17 change that so that all of the approaches for
18 routes coming through from certain directions
19 into downtown will have the same common routing.
20 So as an example, all of these routes, so
21 Niagara, Grant Street, Delaware, they're all
22 going north and northwest out of downtown, will
23 all have the same bus stop, will all travel on

1 the same corridors and be really easy and legible
2 for people to understand.

3 So right now in our system we have some
4 areas where you may be standing at a stop and see
5 a bus go by, but that bus doesn't actually stop
6 there because of a turning issue or a parking
7 lane. So we want to really simplify that routing
8 in through downtown. And we actually have eight
9 of these maps that kind of show the downtown
10 routing being simplified for all of the routes
11 coming in having commonality. The other thing
12 that helps us do is limit the number of stops,
13 make them more legible and allows us to focus our
14 resources in terms of shelters (inaudible) the
15 bench program into those stops to enhance those
16 stops as well.

17 Faster service. I mentioned the new service
18 between downtown Buffalo and Niagara Falls.
19 Right now if you want to get between downtown
20 Buffalo and Niagara Falls through most of the
21 day, you get on the 40, which is really kind of a
22 local service that travels along Niagara Street,
23 River Road, it drives down Grand Island Boulevard

1 on Grand Island and it goes into downtown Niagara
2 Falls. It takes about fifty-five minutes to do
3 so it's not very quick. What we're looking at
4 doing is saying, okay, well, the 40 right now
5 runs every half hour. Let's make it run every
6 hour, but in those other half hours, put the 77
7 there so you get between downtown and downtown in
8 thirty-eight minutes, forty minutes. Really
9 streamline that level of advancement there for
10 those riders, because we know there's a big need
11 for not only individuals in our community who
12 work between those locations, but also for
13 tourists. If you're kind of looking to get
14 between those communities because you're here on
15 a trip and you have to sit on a local service
16 that takes almost an hour to do, that's less
17 beneficial than saying, hey, if you get on right
18 here, you can be up in Niagara Falls in
19 thirty-five minutes. It makes it much more
20 competitive for everyone involved. We think that
21 will be a very popular option for individuals who
22 are making those trips daily.

23 And lastly is eliminations. There were a

1 couple routes, most of these were routes that
2 were suspended during the pandemic that we think
3 will allow us to eliminate moving forward, like
4 the 29 that will allow for investment in other
5 routes.

6 So what are our next steps? So you saw a
7 lot of community and stakeholder feedback on our
8 initial kind of outreach efforts, but we really
9 want to get you back on the concepts. For a lot
10 of people, it's hard for them to have discussions
11 in terms of what their needs are until they can
12 see it and really have something tangible in
13 front of them to talk about. We have a really
14 interesting new tool called Remix that we're
15 using on our transit planning side, but the
16 public will also be able to use to comment on
17 routes and look at routes and comment all the way
18 down to the granularity of bus stops. So we're
19 going to show a video on the next slide that
20 gives kind of an overview of how the staff has
21 been using Remix, but also how the public will be
22 able to use Remix to provide more comments and
23 feedback to us.

1 So we're going to do a lot of partner
2 outreach, we're doing in-person outreach. We're
3 doing in-reach as well with our operators and our
4 supervisors. That's planned for next -- two
5 weeks from now. We're working with our internal
6 stakeholders on that because their feedback is
7 just as important as well. They're the
8 individuals on the frontline who are out there
9 driving these routes every day. They often have
10 great ideas. Same can be said with supervisors
11 as well. And we're going to update those
12 concepts based on what we hear from the public.

13 If we put something out there and the public
14 says, this doesn't work for me, you're missing
15 something, what about going to this location,
16 Remix allows us to be able to publish that almost
17 immediately. I can go back to my desk after this
18 meeting and change a route and be able to publish
19 that instantly. So gone are the days where you
20 have to go through GIS, create a PDF, print it,
21 go do it that way. It really creates a lot
22 better flow of communication that way.

23 So next month we're going to come back to

1 the board, commissioners who are here, with more
2 of a proposal. So instead of saying, hey, we
3 have five alternatives for you to review, we'll
4 say, this is the alternative we like and we'd
5 like to advance forward. So that's kind of where
6 we see that going in terms of the overall efforts
7 here. So it's a quick timeline. We've been on a
8 quick timeline and we've been meeting that
9 timeline. The staff has been putting in a lot of
10 work and appreciate all of the efforts from other
11 departments as well, but we think it's doable and
12 we think we need to do it and the time is right
13 with where we are with COVID as well.

14 So now real quickly we'll show a little bit
15 of a video that Helen is getting ready here
16 relating to Remix. So if you bear with us here,
17 it's just two and a half minutes really quickly.

18 Station engineer and planner Remix. Through
19 the demo of how to use Remix to envision, plan
20 and evaluate your fixed route transit network.
21 It works in any city. Today let's take a trip to
22 Milwaukee, Wisconsin and explore future service
23 connecting Jackson Park to downtown. I'll start

1 by sketching out my first idea for the proposed
2 new service.

3 As I draw, bus stops are automatically
4 identified based on my existing network. On the
5 left, I can see frequencies, costs and
6 demographics. They populate instantly. For
7 example, if I change the frequency of service,
8 say to come every ten minutes in the morning, I
9 can see the cost go up and that I may need an
10 extra bus. If I extend the line to downtown, I
11 can see the cost and vehicle requirements grow
12 again.

13 To understand more about how my proposed
14 service will impact the community, I can quickly
15 overlay demographic data, including poverty and
16 minority information. Checking the interactive
17 origin designation layer helps me fine-tune the
18 proposed alignment or brainstorm other scenarios.
19 I can add layers from any custom data I have such
20 as ridership, future land use or pedestrian and
21 bicycle networks.

22 I now want to view the network more
23 holistically, so I'll bring in all existing

1 lines. This is where Jane comes in. Jane is
2 Remix's isochrone feature. By placing Jane onto
3 the map, I can see how far a rider can go and how
4 many jobs they can reach in fifteen, thirty,
5 forty-five and sixty minutes. I can visualize
6 the impact with and without my proposed project.
7 From the park area, Jane can reach about fifty
8 thousand more jobs within an hour with my new
9 line.

10 Once I'm done with my map, it's easy to
11 share, export and collaborate with colleagues,
12 elected officials and the community through the
13 Web-based platform. Once everyone is happy with
14 my proposal, it's time to plan my service down to
15 the minute. In the timetable, I can customize
16 time points, segment level speeds or trips.
17 Seeing these impacts is powerful because it lets
18 me center conversation around the trade-offs
19 inherent to designing quality transit service.
20 This is just a quick tour of Remix. To learn
21 more about planning transit in Remix, get in
22 touch at Remix dot com.

23 So the video really focuses kind of on

1 the -- why it's beneficial for me and my
2 department. It's also very beneficial from the
3 public side. So when we publish the map, which
4 we're planning on doing tomorrow. We have a
5 dedicated website for this project that Helen's
6 team is working on. Individuals will be able to
7 click on it, leave comments, we get those
8 comments immediately. The comments will be
9 aligned directly to specific routes (inaudible)
10 bus stops. Really a great level of granularity
11 for us.

12 So I'll stop there and take any questions
13 that anyone might have.

14 COMMISSIONER BAYNES: One question. On your page
15 four, forty-three percent of the respondents said
16 they plan on riding transit less frequently.
17 That was in June of 2020?

18 MR. JONES: Correct.

19 COMMISSIONER BAYNES: Was it just because of COVID or
20 do they totally plan on --

21 MR. JONES: Yeah. I think most of it was -- I don't
22 know exactly how we framed the question, what
23 time frame was there, but we weren't thinking

1 permanently. It was right now are you going to
2 ride the same in the future, the near future, are
3 you going to ride less? And twenty-nine percent
4 did say they were going to ride the exact same.
5 Some people said they were going to ride more.
6 But a lot of people said they were going to ride
7 less. So I think it's more of a perception
8 issue. And we always struggle with that
9 perception issue even during the pandemic. A
10 recent study did come out and say the air on a
11 bus recirculates more often than the air
12 essentially in this building or really anywhere
13 because you're opening the door all the time so
14 you get more of that air circulation. It's
15 really communicating that to the public and
16 getting them comfortable again with transit I
17 think is a lot of it.

18 COMMISSIONER BAYNES: Thank you.

19 CHAIR SISTER ROCHE: Any other questions?

20 COMMISSIONER BLUE: Reverend Blue. Hello everyone.

21 CHAIR SISTER ROCHE: Hello, Reverend Blue.

22 COMMISSIONER BLUE: My question, when it comes down
23 to the ridership, is that all of those statements

1 were back in June. With the new opening now and
2 a lot of the restrictions being eased, I think
3 ridership may increase. And I know you made the
4 knowledge of the telemedicine and things of that
5 nature, but a lot of people are still wanting to
6 go I know wanting to go and see their doctors.
7 And, also, although shopping online has
8 increased, it's only increased because of the
9 pandemic. And you would still have those riders
10 who will do a lot more in-person shopping as
11 well. Because even with on-line shopping,
12 it's -- the extent and the satisfaction of people
13 are just online shopping because of the pandemic
14 has been high, but there's still a lot of people
15 who are unsatisfied with online shopping because
16 of returns and things of that nature. People are
17 starting to get out and to socialize.

18 So I'm glad we have this apparatus, this app
19 that we can use to insert changes, but we need to
20 look at that as well. People want to come out
21 because they're social beings. So although some
22 will say during the time of the survey that they
23 wanted to rely on the telemedicine and the online

1 shopping, I think you're still going to see a
2 segment of the population getting back out for
3 socialization. So I just wanted to put that bug
4 and idea as we go forward and make sure that we
5 don't make too many changes too soon for that
6 segment of people that will feel slighted if they
7 don't have that opportunity.

8 MR. JONES: Yes. Thank you. Very well noted.
9 Appreciate it.

10 MS. MINKEL: Yes. Thank you. And I think it's an
11 important point that you're making, Reverend
12 Blue. I think I should highlight that we are
13 looking at pre-pandemic travel patterns as well,
14 assuming and making certain that as we make our
15 assumptions that we have excess capacity on
16 anything that we're proposing so we don't isolate
17 those individuals when they come back.

18 MR. GEORGE: So just one comment on that. We've been
19 tracking a lot of -- whether it's through the
20 transportation research board or a lot of
21 research that's going on as well as this
22 forecasting that we're seeing in the industry.
23 And on the low end, you're seeing forecasts being

1 in the range of a seventy-five percent of
2 pre-pandemic numbers. On the high end, you're
3 seeing closer to a ninety percent recovery to
4 pre-pandemic numbers. And the timing of that is
5 also a question as well.

6 So we're looking at September as a target
7 date for us because we feel we're already gaining
8 some normalcy now. When schools go back, you'll
9 see quite a bit more. And then we'll see through
10 2021 and into 2022 you'll start to see more
11 people normalizing. So those are the numbers
12 we're kind of forecasting right now, seventy-five
13 to ninety percent. So even though there is some
14 changes here, we still have an incredible amount
15 of capacity in our system that will not be going
16 away. You know, our ridership is at -- probably
17 in the range of twenty to thirty percent of our
18 capacity on our vehicles at this point in time.
19 So the comment is great. We're tracking it
20 across not only our system and our community, but
21 across the country and the world to see how
22 people are responding.

23 One last interesting comment I'll just make

1 is that in Europe it's responding very quickly.
2 In Australia it's responding more quickly. The
3 United States is one of the place where it's
4 responding the slowest. A lot of it has to do
5 with, you know, faith in transit, the whole, the
6 whole concept of transit, how it's used in
7 communities, the urbanization. So in the U.S. we
8 believe, and based on international studies, will
9 be responding more slowly than most of the rest
10 of the world unfortunately for us. So just a
11 little snapshot and just some additional
12 information.

13 Mr. Morrell?

14 MR. MORRELL: Good morning, commissioners. So I
15 don't have a video, but I have something as
16 equally exciting, our fare collection system and
17 the upgrade and update of that product. So we
18 are changing out our entire fare collection
19 system. We're changing the fare boxes, our
20 ticket vending machines. We're introducing fare
21 gates. We're also introducing something that our
22 passengers are not looking at right now when they
23 access the system, and that's access control.

1 We're putting up fare gates and fences in the
2 underground stations.

3 When I talk about smart cards, when we
4 introduce an account based system, what we're
5 looking at is a system that's very similar to
6 what you see on a thruway, the card that's in
7 your car. This is a card that we'll be using.
8 You tap the system and you'll be able to go
9 through fare gates as well as the fare boxes on
10 the buses. What's interesting is the value is
11 not on the card. The value is within an account
12 based system. So if you lose your card, you just
13 register with the system and you will be able to
14 get a new card and you don't lose the value
15 that's inherent in the system.

16 We're also looking to provide easy access
17 for our fare products. Once you get your fare
18 card -- and we'll talk about how we're going to
19 distribute that a little bit later. Once you get
20 that card, what's going to happen is those
21 individuals won't have to get a card ever again,
22 at least for another five to seven years. What's
23 going to happen is they'll use a portal on the

1 Web, through their phone or through a computer.
2 So each month right now we distribute thousands
3 of passes that we print here in-house and then we
4 distribute them. That's going to go away.
5 Individuals will just keep their card and they
6 will just put value onto their card every month.
7 We're trying to streamline that process for our
8 individuals that we deal with, all our partners,
9 the Board of Ed, our employers, that they
10 wouldn't have to get cards every month, that
11 those cards would be distributed to their clients
12 each month and then they would go on the portal
13 to put value on those cards. It's going to make
14 the system a lot easier. And what's going to
15 happen is once an individual touches the system
16 through the card, it would get their origin and
17 destination data. That will provide information
18 to service planning that would allow us to track
19 individuals, where they're going. Not
20 individuals, but their, their journey.

21 So where are we right now? We're in final
22 system development and testing. We're looking at
23 the back end, seeing how this system actually

1 works. Constantly reviewing what the vendor is
2 providing. But what's more important is what
3 we're providing is PCI compliance. That's our
4 payment card industry standard. And what that
5 does is it's making sure that everyone that uses
6 a credit card, that it's safe. We're making sure
7 that the merchant services management, you swipe
8 your card, that all that data is safe within the
9 system. And how are we doing that? One of the
10 main things is through our cellular network.
11 That's being developed by our vendor on our
12 system -- I mean, the data will not be going
13 through our system.

14 Talking about hardware installation. So
15 we're changing out about three hundred fare boxes
16 within the system. We're about two hundred and
17 seventy-five in right now, and we have over two
18 hundred thousand instances currently where a
19 transaction has gone through the new fare boxes.
20 All new TVMs in our stations are complete. We
21 have new fare gates that's going in that's the
22 fencing around them so individuals won't be able
23 to get through the system. And our

1 administrative point of sale which is within our
2 customer service area is being developed right
3 now.

4 We're also looking at our third-party
5 integration. We're looking at working directly
6 with our universities, colleges, the Board of Ed,
7 Social Service Department and our employers to
8 make sure that they can get onto our portal
9 easily and work through the system where it's
10 efficient for them to get all their passes and
11 making sure that the system works properly.

12 So right now we have a retail network that's
13 about fifty locations where individuals can buy
14 their passes. We're working with this company
15 called InComm where we're going to have over two
16 hundred and seventy locations where individuals
17 can go in and upgrade their value on their cards.
18 And that is a process that -- you know, it's
19 taking some time to get these establishments, but
20 going from fifty locations to over two hundred
21 and seventy is going to make our passengers a
22 little easier to get value onto their card.

23 Now, we have to finalize our fare policy.

1 We were here back in 2015 to look at the fare
2 policy. And what is the fare policy? Our fare
3 policy is basically guidelines to establish the
4 restructuring and fares within the system. The
5 board is required to adopt the fare policy. That
6 was the one that was adopted in 2016. And what
7 does that guide? That guides fare payment, fare
8 structure, as well as fare equity. We have to
9 make sure that what -- the product that we're
10 putting out is fair across the board.

11 So in 2015 we advanced a fare policy to our
12 vendor Scheidt and Bachmann to begin development
13 of the system. In 2016 we came to the board and
14 what they did was approve that fare policy that
15 included a number of items that I'm going to go
16 through a little bit later. But, what we found
17 over the past three or four years in the
18 development of the system is there were areas
19 that we did not include in that structure. That
20 included fare capping at all levels, how are we
21 going to distribute the cards as well as how
22 individuals at the youth level access the system.

23 Now, our previous fare policy that was

1 adopted in 2016 included all these different
2 elements. Day cap. When I talk about day
3 capping, that means that an individual would not
4 pay more than five dollars per day. The card,
5 that individual will get on the bus, they would
6 tap, two dollars on their first tap. The next
7 bus, two dollars will come off their, off their
8 account. The next tap would be one dollar. So
9 the individual would not pay more than five
10 dollars in a day.

11 The rest of these items that the board
12 approved are already set within our fare policy.
13 Weekly pass, enhanced thirty-one day, seven-day
14 pass, monthly pass as well as our thirty-one-day
15 pass. We have also passes for individuals that
16 are in our PAL system as well as our youth for
17 the Summer Go pass, individuals that's receiving
18 a reduced fare as well as our youth half fares
19 for individuals that are ten and under will now
20 have to pay full fare. I mean, ten and under
21 would now pay full fare. Okay? So what that
22 means is this. Individuals currently that are
23 nine and under -- ten and under now pay half

1 fare. Individuals that are nine and under now,
2 under the new system, will be free with a fare
3 paying adult. The problem that we're having is
4 that individuals within this category that are
5 nine and under, if they do not have a fare paying
6 adult with them would now be required to pay a
7 full fare. So that's some of the discussion that
8 we would like to have today regarding this
9 specific area.

10 So we go back to those areas that we did not
11 include in our previous adopted fare policy.
12 Fare capping at multiple levels. We're looking
13 to do day capping, possibly week capping, but
14 also monthly capping. Right now our monthly cash
15 fare is seventy-five dollars per month. Under
16 our proposal, we're looking to do it at the
17 monthly level with an individual not paying more
18 than seventy-five dollars in a given month. They
19 pay five dollars in a day. They continue to pay
20 that. Once they reach seventy-five dollars, they
21 stop paying for the month. That element within
22 the fare policy is something that we would like
23 to do moving forward.

1 Youth access concerns. I'm talking about
2 those individual that are double digits in age.
3 Ten and up now pay full fare. Individuals that
4 are nine and under pay no fare if they're with a
5 parent or a full fare paying adult; but if
6 they're by themselves, they pay full fare. That
7 is a concern of ours. Tom is going to get into
8 that a little bit later as to how we bring that
9 together.

10 The other issue that we would like to have a
11 discussion on is our new smart card distribution.
12 How are we going to distribute these cards to all
13 the individuals that's currently using our
14 system. We originally thought about charging
15 everyone two dollars per card. So if you get a
16 new card, it's going to cost you two dollars.
17 What we began to think about is, from an equity
18 standpoint, is that fair? For those individuals
19 that currently get a card for free when they pay
20 their five dollars or when their buy their
21 monthly pass. What we're looking to do, our
22 recommendation moving forward, is to have a mass
23 distribution, but what we don't want to do is

1 flood the system to where individuals will be
2 getting these cards and throwing them away
3 because they're not really of value to them at
4 this point. So what we want to do is develop a
5 system to where we can distribute these cards to
6 where individuals will hold on to them and keep
7 them for the future as we implement the system.

8 So at this point, I want to turn it over to
9 Tom -- no. I'm sorry. I'm sorry. Yeah. Turn
10 it over to Tom so that he can bring it all
11 together. And if there's any questions, I'll
12 entertain questions.

13 COMMISSIONER BAYNES: I have a question. How do you
14 ensure that the community that doesn't have cell
15 phones or computers or credit cards have access
16 to -- is it the third-party --

17 MR. MORRELL: Yes. Yes. So the third-party -- we
18 have a retail network of about two hundred and
19 seventy locations. We're going through an
20 exercise right now where we're looking at these
21 deserts, those places where those retail networks
22 are not in those areas as well as where there's a
23 digital divide; and if they match, we know that

1 we have to either provide a location for those
2 individuals within those communities to go and
3 upload value onto their card. What we found back
4 in '15 was that we thought that there was going
5 to be a very big increase in the number of
6 individuals that don't have smartphones. That
7 has pretty much gone away. Most everyone has a
8 smartphone. What we're looking at also is those
9 individuals that are unbanked. So those
10 individuals that don't have access to a regular
11 institution, M and T, KeyBank and stuff like
12 that. But, most individuals do use their phones
13 to get to digital retailing. They also use
14 what's called Green Dot cards and cards that are
15 used on -- that you can load that's not part of
16 institutions like M and T and KeyBank. So we
17 are --

18 COMMISSIONER BAYNES: So if they came in with cash,
19 would you -- how would they pay for their card?

20 MR. MORRELL: Okay. So an individual at the --
21 through a TVM, the APOS that's downstairs, to a
22 retail establishment, they would come in,
23 purchase the card. Now they have the card.

1 COMMISSIONER BAYNES: With cash.

2 MR. MORRELL: With cash.

3 COMMISSIONER BAYNES: Okay.

4 MR. MORRELL: Now they have the card. Then they go
5 to that same establishment or other locations
6 that we provide, downstairs, ticket vending
7 machines, and they put value on their card. But
8 in addition to that, they can do it mobily on the
9 phone or on the Web.

10 COMMISSIONER BAYNES: Okay. Thank you.

11 MR. GEORGE: So we're going back to the public here,
12 public for input this month, in June. In July
13 we're going to be coming back to the board with a
14 firm proposal on service. So all of the input
15 that Rob's group gets, based on everything that's
16 on the Remix and the outreach will be summarized.
17 Then we'll present our report to you in July as
18 to what we're recommending.

19 We're also going to be asking for feedback
20 on the fare. So we are recommending today that
21 we go with full monthly capping. Previously we
22 did not have that. So now anybody in our
23 community who accesses the MetGo system -- and I

1 want to make a point. James talked a lot about
2 the card, but the card really is only necessary
3 if you don't want to use your smartphone.
4 Because it's -- there's a full app on MetGo that
5 allows you to do everything that you can do with
6 a card, including use your phone to swipe your
7 way into the rail, use your -- or, use your phone
8 to swipe your way into the rail, use your phone
9 on the fare box on the bus. So there's a whole
10 part of our community that doesn't want to have
11 another card in their pocket then they won't need
12 the card. But, those who do, we would like to
13 distribute those free of charge initially, so
14 we'd like to develop a program where we have free
15 distribution of cards for those individuals who
16 want to have a card.

17 The goal here is to promote the use of the
18 system as much as possible. Okay? It provides
19 better value to our customers, it provides a more
20 equitable distribution of service to the
21 community who needs that and also reduces cash in
22 our system so we don't have to count cash. Most
23 of you have never had the pleasure to go to our

1 cash counting center. But, it's not the optimal
2 21st Century system that we're operating, so we
3 want to get into more automated and reduce that
4 cash as much as possible. So we believe that the
5 monthly fare capping is the more equitable
6 solution that will encourage more people to move
7 out of the cash and into the system and is better
8 for our community as a whole.

9 And the other part that we just want the
10 board to recognize and to be aware of is I
11 believe right now that if you are below -- is it
12 eight years old?

13 MR. MORRELL: Nine.

14 MR. GEORGE: Nine now -- or nine and up you pay half
15 fare. We're moving that to ten and saying you're
16 going to be free from ten under if you have an
17 adult with you. So children under the age of ten
18 who are in the system without an adult will be
19 required to pay a fare. The only fare that will
20 be available to them will be a full fare. That's
21 a change. All right? So we want the board to be
22 aware that that's the change.

23 What we're going to do in July as well is

1 bring this in a formalized manner to you with the
2 service changes and a Title Six equity analysis
3 and we're going to say to the board, here's what
4 we want to go to the public with, this is our
5 final recommendation, please authorize us to go
6 to public hearing in August. We'll also -- then
7 we'll introduce a whole public feedback process
8 and we'll be asking the board to approve that.
9 Once we go to that public hearing -- we get that
10 approval, in August we hold those public
11 hearings, in September we come back to you and we
12 say, this is what we told you we wanted to do in
13 July, this is what the public said, we have now
14 revised that or we haven't revised that or what
15 we've done, so we'll give you all the summary of
16 the public feedback we get through that process,
17 any changes we make, and we'll be bringing to you
18 something we're asking you at that point to
19 adopt. It will be a new service plan and new
20 fare structure -- or, in this case additions to
21 the fare structure. Primary focus is on that
22 monthly capping piece.

23 So if that does occur and the board likes

1 what they see and it wants to agree with what
2 we're doing or asks us to consider other things
3 or pushes back and decides we want to do some of
4 it or others, that's a discussion we have in
5 September. If the board adopts that in September
6 then we roll through in October through December
7 and implement the changes and implement what we
8 do with the fare policy in the -- as the system
9 rolls out.

10 So that's kind of a summary of where we are
11 today and where we, where we plan on going and
12 we're really looking again for as robust public
13 input as possible on this process.

14 MS. MINKEL: Tom, do you want to mention how this
15 reduces dwell time? As we talk about bus stop
16 balancing, as we talk about changing the service
17 network, one of the advantages is that it also
18 reduces dwell time. So with the old system, more
19 people using cash, it takes longer for people to
20 board and it's less efficient.

21 MR. GEORGE: Yeah. It really does improve efficiency
22 on the system. And it does a lot of things for
23 our operators as well. It's really a nicer

1 system for our employees to implement, and we're
2 hearing a lot of really positive feedback from
3 them. But, Kim is right. If some of our bus
4 stops are really heavy, and the work Rob is
5 looking to do downtown Buffalo where we're really
6 consolidating some of those stops and making them
7 better amenities, you get a whole group that gets
8 on with their smart cards, they tap, tap, tap,
9 tap and off we go. So it's really -- it's a
10 modernization. It's a modernization of the
11 service. It's a modernization of the system.

12 COMMISSIONER BAYNES: One question. So children that
13 are ten and under, if they're with an adult, they
14 ride for free.

15 MR. GEORGE: Correct.

16 COMMISSIONER BAYNES: So why would you change them if
17 they're not with an adult?

18 MR. GEORGE: They need a methodology to get into the
19 system. So a child shows up at a fare gate by
20 themselves, they can't open the gate. They need
21 to have some way to open a gate. They need to
22 have some way to get onto a bus.

23 MR. MORRELL: So, currently, you can go to a TVM

1 machine and purchase a half fare card. Under the
2 new system, we are issuing half fare cards as
3 well as PAL cards for those individuals that take
4 our PAL service. So we issue the card. We know
5 that you're a PAL customer. We know that you're
6 a reduced fare customer. Currently, right now if
7 a person buys a TVM -- out of the TVM a half fare
8 card, they then have to show some other form of
9 method to the operator and the ticket inspector.
10 Moving forward, because there's gates, there's no
11 way that an individual that's checking the
12 tickets will know that that is a person that
13 should be getting a half fare. Currently, you
14 have to show two forms. All right? So we don't
15 have a method for an individual to purchase a
16 half fare card currently -- I mean, in the
17 future.

18 MR. GEORGE: And these half fare cards all have a
19 photo ID on them as well.

20 CHAIR SISTER ROCHE: Anybody, then, who pays full
21 fare, say being twelve or thirteen or something,
22 covers for the one under ten?

23 MR. MORRELL: Theoretically, yes.

1 MR. GEORGE: Yes.

2 CHAIR SISTER ROCHE: Okay. So there just has to be
3 another rider --

4 MR. MORRELL: A full fare paying person, yes.

5 CHAIR SISTER ROCHE: Okay.

6 MR. GEORGE: And, you know, we don't promote a lot of
7 younger kids riding the system by themselves,
8 just as a sidebar. That's not something that --
9 I mean, it happens, we're cognizant of that, but
10 we try to provide a safe and as clean of a system
11 as possible, but it's not an environment that we
12 control. Thank you.

13 CHAIR SISTER ROCHE: Any other questions?

14 COMMISSIONER BLUE: This is Reverend Blue. I have a
15 question. Now, if the full-fare rider has three
16 children under nine, all of those children ride
17 for free?

18 MR. GEORGE: That's correct.

19 COMMISSIONER BLUE: Okay. And I just want to say I
20 commend you on what you guys are doing. If you
21 have someone who is, who is having problems with
22 their phone, per se -- because some companies
23 aren't offering the smartphone. They are still

1 offering the flip phone. We need to be aware of
2 that too. AARP, they're not -- some of their
3 phones are just flip phones and some of the other
4 companies that offer phones to senior citizens
5 and to other agencies, they're only offering the
6 flip phone, so it doesn't have the LED screens
7 and things of that nature. Have you considered
8 an alternative to that, just if they don't have
9 the card or a smartphone?

10 MR. GEORGE: We've not been able to recognize any
11 alternatives other than the smart card, and
12 certainly that's why we're focusing on advancing
13 a free distribution -- a free, broad distribution
14 of smart cards in the community, because --
15 specifically for that, folks who are
16 uncomfortable with a digital environment, folks
17 who don't have access to smartphones, folks who
18 just have limited service and are concerned about
19 having service in areas. We want to make sure
20 that there's a viable option. And, again, that's
21 really why we wanted to promote that free
22 distribution of those so we could get as broad as
23 possible.

1 COMMISSIONER BLUE: Thank you. I would -- at the
2 risk of losing my neck, I'm going to say this.
3 When you have those public meetings, if I am
4 available, I would like to -- let me know if I'm
5 overstepping or if I'm doing something that's
6 not -- well, let me know what I can do to assist
7 if you have any of those public meetings and you
8 would like a board member there. Because
9 sometimes -- and I do believe it will be better
10 to have someone there on the board and not just,
11 not just you guys there by yourselves, that
12 can -- so they can have a comfortability that
13 they're not only being heard, but they have
14 somebody who can help make a decision on the
15 proposal. I think this would be good for both --
16 for you when you make your -- or whoever makes
17 the presentation and for the audience as well.
18 You know, I'm not afraid of getting -- of having
19 eggs thrown at me. I make pretty good omelettes.

20 CHAIR SISTER ROCHE: That's very kind of you,
21 Reverend Blue.

22 MS. MINKEL: Well, thank you, Reverend Blue. We
23 appreciate that. I will send out the schedule to

1 all board members, so anyone who has interest in
2 being at the events can be there so that way you
3 can share the eggs.

4 MR. GEORGE: And you can't see me in person, but I
5 have a big smile on my face with that comment.

6 CHAIR SISTER ROCHE: Commissioner Perry?

7 COMMISSIONER PERRY: So I was just -- so I'm hoping
8 that this time that we'll also invite or have the
9 meeting open to members of the Erie County
10 Legislature. Because I understand from a letter
11 that they wrote that they were intentionally
12 excluded, we told them they couldn't come to any
13 of these other past public meetings. Is that
14 right?

15 MS. MINKEL: No one's ever been excluded.

16 MR. GEORGE: No.

17 COMMISSIONER PERRY: Okay. Well, that's what they
18 said in the letter, so I thought they -- that's
19 what it seemed like the letter said. So they --
20 it's always been open to them, they're invited,
21 they know -- it's a public notice, they have full
22 notice and the same thing will happen like it's
23 always happened next time.

1 MS. MINKEL: Absolutely.

2 COMMISSIONER PERRY: Great. Maybe we won't get
3 another letter like that.

4 MS. MINKEL: Thank you, Tom.

5 CHAIR SISTER ROCHE: That's a good discussion. And
6 congratulations to all of you who have been
7 working on this for such a long time.

8 And, Commissioner Perry, I'm going to call
9 on you again to give the aviation report.

10 COMMISSIONER PERRY: Thank you, Sister. And I'm
11 going to ask Bill Vanecek to start us off with
12 the airport improvement project details.

13 MR. VANECEK: Okay. Well, there's really not too
14 much to report on there. Of course the big one
15 is the fact that we opened up a significant
16 portion of the terminal enhancement project on
17 the 18th. And it is just getting rave reviews by
18 everybody that sees it and uses it. It really
19 has changed the dynamics of how people are
20 traversing through the airport and getting out
21 quicker and getting to enjoy Western New York on
22 a much quicker access.

23 So we still have some time to go on that.

1 It won't be entirely completed until -- we'll say
2 December 31st, but we're hoping it will be
3 approximately a month earlier than that. That's
4 when the last two baggage carousels will be put
5 into service, and at that point we can say we've
6 done it, we've got it all done and off you go.
7 So we're very, very excited about that.

8 And, you know, the other ones that are out
9 there, the big one is the engineered wetlands
10 which is ongoing. There's really not a lot to
11 talk about there. So I'll try to move through
12 this quickly because I think we're running a
13 little bit behind on time here.

14 So just a couple of quick notes. Our
15 enplanement numbers for May came in at almost a
16 hundred and twenty thousand for this year, and
17 that compares to seventy-five thousand last year.
18 So we're seeing a big jump now as we're going
19 forward. For the first two months we're up two
20 hundred and sixteen thousand versus a hundred and
21 forty-one last year.

22 A couple of items. Our bottom line, our net
23 surplus was three hundred and four thousand for

1 May, 2021. That was really attributable to a
2 couple of things. The concession revenues are
3 really starting to climb now, and most notably
4 parking. And there's a note a little bit further
5 down that talks about parking changes. If you
6 recall, we opened up the lots back to full fares
7 in the beginning of April and now we're really
8 seeing the bearing of fruit of that. So people
9 are using our parking lots and we're seeing a big
10 jump in the parking revenues. Talks about the
11 CARES expense operating assistance was a
12 million -- little over a million dollars of that.
13 Definitely helped our bottom line here as well.
14 So on a year-to-date basis, we are currently at a
15 surplus of eight hundred and seventy thousand
16 dollars so far in the month -- in our 2021 year,
17 I guess -- 2022 year I guess it is.

18 A couple of other items I wanted to point
19 out. So we're seeing it in -- it will look odd
20 in your book, but when you're on page -- I don't
21 know what number it is here. Anyway, it's on the
22 concession revenue (inaudible) and enplanement
23 and deplanement number. You'll see some

1 staggering numbers on the left-hand side that
2 we're getting twenty-four dollars per
3 enplanement. Well, it's a little bit misleading
4 because back in the days when we were having --
5 dark days in April, et cetera, our concessionaires
6 were still paying their minimum annual guarantees,
7 so those numbers are wrapped up in here so the
8 number is much higher. We're getting to see a
9 little more normalization now on the right-hand
10 side, but they're still very healthy,
11 particularly in the parking operations. People
12 are really coming back to our lots which is
13 great.

14 If you look down on the next page, again,
15 you can see how much -- how dramatic it is with
16 respect to parking revenues, both in the daily
17 lot and in the long-term lot. It's just a huge
18 jump. If you compare the number of cars that
19 were parked in the long-term lot in May was a
20 little over thirteen thousand versus thirteen
21 hundred the year before. So it's starting to
22 rebound nicely.

23 I wanted to talk just a little bit about

1 some of the airline market shares and what
2 they're doing at this point. So when you look at
3 the BNIA, again, we talked about where we're at
4 from a -- you know, nineteen -- a hundred and
5 nineteen thousand 2021 enplanements for May. And
6 that's a pretty healthy load factor. If you do
7 the math on this, the load factor is a
8 calculation of how many seats do you have on a
9 plane and how many people are filling them.
10 Well, in the month of May, they were filling
11 eighty-three percent of the seats. And if you
12 look back on last year, it was twenty-two percent
13 of the seats. So we're really seeing a nice
14 rebound at this point. The airlines -- and
15 that's also apart from the airlines have now
16 started adding some more flights. I went through
17 a lot of those last meeting, so I don't think we
18 need to go through them again. But, I can tell
19 you, overall, all of the airlines are upping
20 their number of flights that are going out of the
21 airports so that's great news for Western New
22 York.

23 Niagara Falls. Of course we're still

1 hurting from the Spirit impact. They're not back
2 yet. They haven't told us they're not coming
3 back, but right now I would be -- I wouldn't see
4 it until maybe kind of the fall time frame
5 there's usually a little bump and then getting --
6 ramping up to speed next year.

7 What else did I have in here? So, I did
8 want to point out, again, you can see all the
9 (inaudible) in here, but, again, all the airlines
10 are doing really, really well. But I wanted to
11 point out that our twelve-month period ending
12 February, '21 versus the same period last year,
13 we actually had -- we had a decrease of
14 sixty-nine percent, relatively speaking, of
15 similar sized airports from where we were
16 positioned. It's one hundred percent
17 attributable to the border closing. Absolutely,
18 one hundred percent. Because we're still not
19 seeing that happening. Again, I've said it
20 before, twenty-five to thirty percent of those
21 people are going to be down here. And given the
22 fact that they've come out now and said they're
23 not going to open up the border until they have

1 seventy-five percent fully vaccination of people,
2 I don't see this happening until the fall unless
3 something dramatic changes.

4 Niagara Falls we've already talked about. I
5 did want to mention one thing. There was an
6 issue that we were able to sidetrack, if you
7 will. The Town of Niagara has the landfill and
8 they have -- you know, they were going to build
9 buildings up in areas that could impact flight
10 operations which would really jeopardize the
11 ability of the military to operate the planes
12 into that airport that they need to fly. So what
13 they did is they put together something which is
14 called an airport protection plan that will limit
15 heights, so we're now completely filled around
16 the airport of all the communities that joined --
17 that have stepped up and done this, and Niagara
18 was the last one to do it, so now we will be able
19 to continue to accommodate the military aircraft
20 which is critical to obviously -- obviously to
21 Niagara County in particular.

22 MS. MINKEL: And for future missions, too, Bill.

23 MR. VANECEK: What's that?

1 MS. MINKEL: And for future missions.

2 MR. VANECEK: And for future missions as well.

3 I really don't have too much. I guess a
4 couple of quick things on -- this would be just
5 the performance ones. We do have some openings.
6 The Anchor Bar is back. And that's a recent
7 picture. Okay? This isn't from previous years.
8 They're flocking back to it. We also have our
9 play gates are all open again as well. And so
10 these adorable children here are actually the
11 granddaughters of (inaudible) who works at the
12 airport, so we (inaudible). And then, lastly,
13 the lounge is open again. We have been getting
14 so many requests on this. And so I stopped in
15 today, and they are up and running and they're
16 getting good visitation to their gate and so
17 we're very happy that at least we're starting to
18 see some of that back to normalcy if you will.

19 So that's really all I have. And I have no
20 board actions for the board when we get into
21 there, so it will be a quick meeting when we get
22 into that portion of that. But, any questions or
23 anything I can answer.

1 I do want to mention one more thing, though.
2 And, Reverend Blue, you're on the line. So I
3 want to just let people know that we are looking
4 at putting in some sort of a -- for lack of a
5 better term, a reflection room that will allow
6 people to have a quiet space before they fly out.
7 There's a lot of travelers that get a lot of
8 anxiety before they board a plane, so we reached
9 out to Reverend Blue to come out and we've
10 identified a space. Now we're starting to look
11 at how we want to build that space out to create
12 a really warm, welcoming and peaceful place to
13 have a little bit of time before you board the
14 plane, so we'll keep you up to date as that
15 project progresses.

16 And if there are any other questions, I'd be
17 more than happy to answer them.

18 COMMISSIONER PERRY: And seeing none, hearing none,
19 that concludes the aviation committee report.

20 CHAIR SISTER ROCHE: Thank you very much. And that
21 concludes the meeting of the committees.
